---

All, it is late in the afternoon, and I don't think we will be able to get a call in today. Tom is most likely tied up with previous obligations.

Perhaps we can regroup tomorrow for a call to confirm planning?

All,

EA will not be able to have a second team in the field next week. Based on earlier conversations, it was anticipated and at this time there is no mechanism available for us to get this support. Can ERT obtain the additional funding needs?

We need to have a call this afternoon, so Tom please tell us when you are available.

The team needs to know what can be accomplished without a reduction in sample locations. The reduction in sample locations is the last option. What areas can be addressed under the current ERT work scenario? Based on this, does the team still believe that this event should move forward given the limitations?

My list of suggested priority areas.  
East Tank Farm—residents present—18 locations  
Wilcox North Process area—resident present—43 locations  
Wilcox Process area Tank 12—seeps—17 locations  
Wilcox Process area Tanks 34-35—seeps—9 locations  
Wilcox Tank 11—8 locations  
Wilcox Tanks 32-33—10 locations  
Wilcox Process area west—7 locations  
Lorraine—57 locations

**Subject:** Fwd: ERT/SERAS help next week at Wilcox, Bristow, OK

Katrina –

I'm at a conference today and giving a presentation early this afternoon. I won't be able to call until late this afternoon. I'm thinking the best way to get this done with the funds we have remaining is for EA to handle the retrieval and provide one installation crew (2-3 person) next week. We would still provide the ATVs and generators for both crews. I'll let Jon crank the numbers under that scenario, but I think that will get us much closer. Since 40 K of our remaining 60 K is for Beacon, it's difficult for us to provide all of the labor, equipment and travel from NJ with the remaining funds. There could be additional savings by reducing the number of sample points, but I'll let EA make that call. I've copied Jon and Pat so everyone can chew on this a bit until we talk later today.

Tom
